Project | Design a Landing Page for charity: water

charity: water logo

Woo 🎉 you are a whole week in to your Career Rotation experience, and it's time for your first Project! These Projects are **real-world, professional-level work**, based on real business challenges from real companies. By completing them, you will gain hands-on experience and bring to life everything you just learned.

INTRODUCTION

As you heard from Tyler at the beginning of this week, charity: water is struggling to connect with college students — a group that's often passionate about causes, socially aware, and eager to make a difference. Recognizing what a missed opportunity it is to engage college students, charity: water is expanding its outreach to this audience. That's where you come in!

As a Digital Marketing Associate, you'll create a new landing page designed specifically for college students. The goal: educate students about the global water crisis while empowering them to take action through donations.

YOUR TASK

You will design a new charity:water landing page using [Canva](#) ➞ [Links to an external site.](#) that inspires and engages college students by:

Eye-Catching, On-Brand Visuals: Bold imagery and/or impactful videos that tell a story

Relatable Messaging: A tone that speaks to your target audience's passion for change.

Strong Call-to-Action: Inspiring your audience to donate to the cause.

HOW IT WORKS

Start by **making a copy** of the [charity: water Google Slides](#) ➡ [Links to an external site.](#). Follow the instructions provided in the deck to understand the specific tasks required for designing an inspiring and engaging landing page for charity: water.

When you're done, create a PDF from your slides ([here's how](#)), and submit the pdf on this page.

To help you submit this first Project, and set you up for success in future ones with some best practices, we recorded a little demonstration of the process. Follow along with the video below:

- ✓ Include your name and the date on the title slide
- ✓ Delete instructions from the slides; submit professional-looking work
- ✓ Don't take pictures of your screen with your phone — capture your work as screenshots!

If you need hints on the project or you're feeling stuck, there are multiple ways of getting help! Attend Drop-In Hours to work on these tasks with your Team Leads and peers, or reach out to the HelpHub if you have questions. You got this 💪

We totally think you ought to add this experience to your resume. Here's a sample resume bullet to show off your experience:

An illustration featuring a woman sitting cross-legged with a laptop on her knees, next to an oversized, stylized resume.

Add This to Your Resume!

Designed a branded landing page for non -profit charity: water, incorporating target audience insights, visual storytelling, and persuasive copy to drive awareness and donations to a global cause.

We can't wait to see what you create - let's get this project going!
